

Environmental Policy

Last updated 6th November 2018

Venture Display Ltd are committed to providing a quality service in a manner that ensures a safe and healthy workplace for our employees and minimises our potential impact on the environment. We will operate in compliance with all relevant environmental legislation and we will strive to use pollution prevention and environmental best practices in all we do.

Our policy therefore, is to:

- Integrate the consideration of environmental concerns and impacts into our decision making and activities.
- Minimise our waste and then reuse or recycle as much of it as is possible.
- Minimise energy and water use within our buildings and processes in order to conserve supplies and minimise the consumption of natural resources. An example of this is our 50KWh Solar Panel System, installed to our roof and generating power for our machinery.
- As far as is possible, purchase products and services that do the least damage to the environment.
- Train, educate and inform our employees about environmental issues that may affect their work.
- Continue to develop a 'recycle or reuse' culture within the organisation.
- Where required by legislation or where significant health, safety or environmental hazards exist, develop and maintain appropriate emergency and spill response programmes. Inclusive to this is our waste ink recycling commitment where 100% of our waste ink is collected and recycled.
